DECLAN RICE'S progressive passes

Men's Euros 2020

Showing all passes that move the ball at least 10 yards closer to the opponent's goal, originating from **defensive** and **attacking half**.

I enjoy watching the England national team and I take interest in Declan Rice. He is mainly a defensive screen but he's also famed for his progressive passing.

From the plots, we can see that he has an average of 8 progressive passes per match. Something I noticed was that Declan's passes tended to be towards the flanks, mostly the left and the passes were mostly ending up at the beginning of the final third.

Most of his passes originated from his defensive half which is normal considering he is always the deepest midfielder.
